P. O. BOX 29-R — GRANTS PASS, OREGON.

Harrold's PEDIGREED STRAIN *Giant - Pansies*

The Most Universally Useful Garden Flower

Easily Grown Anywhere

In Bloom For Months

Hardy Practically Everywhere

HARROLD'S PEDIGREED STRAIN PANSIES, the result of forty-five years of horticultural experience and extensive breeding, afford you the very ultimate in quality with this universally popular, easily grown garden flower. They will stand 10 to 15 degrees of freezing without protection and when given light protection, such as is given other perennials in your climate they are hardy in any part of the United States and most of Canada.

The blooming season of HARROLD'S PEDIGREED STRAIN PANSIES can be extended over a season of at least six months in most places and all year in many favored localities. American bred and grown for our American gardening conditions and taste, they afford you the finest strains from which may be obtained outstanding results. Naturally your local climate and the care you give to their culture will determine these results, probably nearly as much as the strain quality and variety, but pleasing results may be obtained more easily with the best strains even where conditions are not ideal. Bred and distributed for more than 30 years to the critical professional florist and nursery growers of the world, HARROLD'S PEDIGREED STRAIN varieties offer you seeds with which to obtain the best of results under a given culture.

A HARROLD'S PEDIGREED GIANT: This is what a four inch Pansy looks like. Note the symmetrical form, good petal placement and the nice marking that is characteristic of our Pansies.

WHEN TO PLANT PANSIES

The largest Pansy flowers are produced on plants that are from seeds sown in late July, August and early September and transplanted in October or November so as to become established after transplanting before winter. These give the very largest flowers early the following spring. They may be planted and transplanted later in the warm Southern States where they may be grown as a winter flowering plant. July planting, however, is advisable where winters are long and severely cold. Planting too early is of little advantage and where the weather is really hot some difficulty may be experienced in obtaining good germination unless considerable care is taken. Pansies may also be planted indoors in January and February for plants that will be set outside in early spring for late spring and summer flowers. Also the seeds may be planted where they are to bloom in April or May for plants that will give their best flowers during the summer and fall months. In fact in most climates Pansies may be had in flower during the entire flowering season; from that of the earliest bulbs in spring until after frost in the fall. Our packets of seed are liberal in quantity so that each gives you enough seeds of a variety to fill out your requirements for a home garden for an entire season. Our booklet "MODERN PANSIES" that accompanies all orders for seeds or plants gives complete information needed for your success with Pansies.

SELECTING THE VARIETY YOU WISH TO GROW

We offer here a most complete selection of Pansies; probably the most varied selection available from a single growing specialist in the United States. Each variety has its own characteristics although each is of the highest quality we

Two and a half acres of Pansies for seed at one of our growing ranches. This is just one variety. Large scale growing like this is essential to the maintenance of highest quality from a breeding standpoint. Notice uniform, upright habit and robust growth. Size may be observed from the 24 and 32 inch setting width of alternate rows. Harrold's seeds plus good culture mean the ultimate in Pansy satisfaction.

This group picture shows specimens of our Harrold's Pedigreed strain Pansies. They are outstanding for their size and colorful markings. Bowl in this picture is eight inches in diameter. Compare flower size.

SELECTING PANSIES Continued

know how to produce in its individual class. In mixtures the price range to some extent is an index to the capabilities of the variety as to size of the flower and richness of the color range. The more expensive varieties are more highly bred and so more costly to produce. There are colors and combinations in these sorts not to be found in the cheaper varieties. In so far as the quality of the seeds is concerned, however, this is always the highest that can be produced in all Harrold's Pedigreed Strain varieties. We never grow seeds down to a price but always price to a quality.

In bedding mixtures we consider our Harrold's Pedigreed Giant Art-Shades to be the largest flowered. Flower type is predominantly "Exhibition" meaning that the center blotch is less than half the area of the flower and that this is surrounded by wide bands of lighter colors; sometimes two or more. This type also carries some "self" colors (solid colors) as well as pastels with pencilled centers and the duo-tone types. Color tones are light and brilliant. Our Harrold's Pedigreed Giants (the parent of the Harrold's Pedigreed Giant Art-Shades) is a variety which is older therefore a little less modern in size and color. The color range is, however, at variance with that of its progeny.

Our Harrold's Pedigreed Swiss Giants we consider to be the finest available sort of "Fancy" type. This type is distinguished by its large center blotch (sometimes covering more than three-fourths of the flower area) and the narrow band of color around the blotch. Shades usually run much darker than the Exhibition types because of the larger blotch and the near absence of the self colors. Also this type stock carries more reds, blues and bronze shades and less of the brilliant yellows and pastels found in the Exhibition types. The color blend of the two types is sufficiently different to make the use of both advisable for full variety. Our Harrold's Improved Swiss is more closely held to the original Swiss strain coloring with a bit smaller flowers and less varied color range. They are improved over the original Swiss strain as imported from Europe in that they have been bred to better meet our American growing conditions.

Formal colors are of use only where beds are set to a planned color scheme. We have offered here the very cream of these colors and those that may be classed as truly giant. In growing this group it must be remembered that no separate color Pansy grown from seed can be depended on to be 100% true to color or marking and so it is always necessary that transplanting be done into selection beds from which true color and type plants are selected for the final display bed. The care in this selection depends on the uniformity desired and the color used but for such work it will be necessary to grow from twenty to fifty percent more seedlings than will be used in the final planting. Our stock is as true as any we know of in this respect but the condition is universal.

The novelties are either new and unusual or special purpose varieties which almost any fancier will find of interest to grow. Each is described here and so other than recommending them to you for their interest and usefulness we refer you to these descriptions.

Modern Pansies

Their History, Culture and Habits.

In order that you may grow Pansies easily and more satisfactorily we have just issued a new and much enlarged edition of our cultural booklet under the above title. As far as we know this is the most complete treatise on Pansy culture now in print comprising some 7,000 words of text describing the history and habits of Pansies as well as the most minute cultural detail both for the home gardener and the commercial grower producing plants in quantity. This booklet is FREE WITH EVERY ORDER for either Pansy or Viola seeds or plants. Those desiring this booklet alone may obtain a copy by remitting TWENTY-FIVE CENTS IN COIN. It will be mailed prepaid by return mail.

HARROLD'S OUTSTANDING NOVELTIES

HARROLD'S PEDIGREED NOVELTIES

These are a blend of seeds grown from NEW TYPES in our breeding department. While they do have a large number of the better types from the other Harrold's Pedigreed Varieties, many unusual new types are included that are still in the development stage and have not as yet been incorporated into any of the regular strain varieties. Recommended where the most varied and unusual is desired. SEED PRICES per packet, about 500 seeds, \$4.00; 1/8 oz., \$10.00. NO PLANTS of this variety will be available this year.

HARROLD'S SUNSET GIANTS

Our outstanding 1944 novelty introduction. Sunset shades of orange, red and gold. Giant in size the markings range from blotched to ray types with some yellow selfs. Shading is brilliant and a bed of these is sure to attract much attention. SEED PRICES per packet, about 500 seeds, \$3.00; 1/8 oz., \$8.00. PLANT PRICES: ready after Sept. 15th., 25 for \$3.00; 50 for \$5.00; 100 for \$8.00 postpaid.

HARROLD'S PEDIGREED POT PANSIES

A short, compact growing type adapted to pot or porch box growing. Flowers are large and color range is very brilliant. SEED PRICES per packet, about 500 seeds \$2.00. Plants of this variety WILL NOT be available this year.

HARROLD'S PEDIGREED CUT-FLOWER PANSIES

We have two distinct types of these and depending on requirements either selection has a definite value.

ORIGINAL STRAIN: This was our first type offered 16 years ago. Growth is rather low but under glass the flowers are large and on stems 8 to 12 inches long. The color range is about as varied as regular bedding types and the plant is just as hardy as the bedding varieties. Suitable for outdoor growing where the stems may be a bit shorter, though satisfactorily long for bouquets. SEED PRICES: per packet, about 500 seeds, \$2.00. PLANTS: after Sept. 15th., at the same price as our Harrold's Pedigreed Giant Art-Shades.

TALL SELECTION: These grow taller; up to 4½ feet and stems are usually 10 to 16 inches long and quite stiff. Color range is the best of any of the tall growing strains and flower size is good under proper culture. The plants of this variety will freeze at temperatures below 20 above zero. Recommended out of doors only in mild climates. SEED PRICES: per packet, about 200 seeds, \$3.00. NO PLANTS of these will be available this year.

HARROLD'S ALL-AMERICAN BEDDING MIXTURE

This is a blended mixture; 80% is from ALL the Harrold variety originations and 20% is from the many other varieties which we grow or receive from other sources. This is a very useful general purpose mixture and is an outstanding value in the popular price range. Highly recommended for general bedding. Flowers are giant in size and the coloring is most varied.

SEED PRICES: Per packet, about 500 seeds, \$1.00; 1/8 oz., \$1.75; 1/4 oz., \$3.00; 1/2 oz., \$5.00; 1 oz., \$9.50; 1 oz., \$18.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th. — 25 for \$1.50; 50 for \$2.50; 100 for \$4.50; 250 for \$9.00; 1,000 for \$30.00 postpaid.

HARROLD'S PANSIES ARE unsurpassed in size and color, texture, hardy and robust plant habit and long flower stems. They are just as easy to grow and are much more interesting.

A SPECIMEN OF OUR HARROLD'S PEDIGREED GIANT ART-SHADES. An outstanding Exhibition variety. Size reduced 1/4.

HARROLD'S IMPROVED SWISS

Where a "Fancy" type mixture is needed and price is a consideration this one is to be highly recommended. Not as good as our Harrold's Pedigreed Swiss Giants of course, but it is not to be excelled by any strain we know of usually offered as "Swiss" in this price class. It is unusually suited in color, size and habit to the demands of the American gardener. Flowers are of giant size, up to four inches in diameter and the color blend is especially rich.

SEED PRICES: Per packet, about 500 seeds, \$1.00; $\frac{1}{16}$ oz., \$1.75; $\frac{1}{8}$ oz., \$3.00; $\frac{1}{4}$ oz., \$5.00; $\frac{1}{2}$ oz., \$9.75; 1 oz., \$18.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th. — 25 for \$1.50; 50 for \$2.50; 100 for \$4.50; 250 for \$9.00; 1,000 for \$30.00.

HARROLD'S FORMAL COLORS

These formal colors are useful for borders or bedding where it is desired to carry out a color scheme or design. It should be remembered, however, that NO separate color variety is 100% true from seeds (usually from 80 to 90%) and that for a true color bed it will be necessary to eliminate off color plants.

HARROLD'S AZURE GIANTS: The finest intensely blue Pansy.

HARROLD'S GOLDEN GIANTS: Deep golden yellow with large velvety blotch.

HARROLD'S RUBY GIANTS: Shades of deep red in the finest color range.

CORONATION GOLD: The finest pure yellow self. Slightly penciled or no marking.

KING OF THE BLACKS: Large velvety black-purple. The darkest Pansy.

LORD BEACONSFIELD: Violet blue, top petals white.

MINIATURE MRS. SCOTT: Plant of these miniatures are only about 8 inches tall covered with perfect miniature Pansy flowers about the size of a 25 cent piece. Coloring of this one is the same as Beaconsfield.

MINIATURE BABY DELIGHT: Same as above only light blue with pleasing face.

SWISS BERNA: A very large violet blue.

SWISS LUNA: Sulphur yellow self. Variable.

SWISS PURE WHITE: The finest pure white. Fragrant and lightly ruffled.

NOTE: The flowers produced by separate color varieties are never quite as large as those of the mixtures. Roguing required in their production does not allow making full use of the large hybrids. Three inch is about tops for these.

SEED PRICES Any of the above varieties per packet of about 500 seeds, \$1.00; $\frac{1}{16}$ oz., \$2.00; $\frac{1}{8}$ oz., \$3.50; $\frac{1}{4}$ oz., \$6.00.

PLANTS: A selection will be available but not all. See our fall catalogue for list

Viola Seeds

Violas are a very satisfactory companion to Pansies and in many instances they are most desirable. The following lists the finest sorts available today, all highly recommended. Culture is the same as for Pansies.

SEEDS PER PACKET (about 500 seeds) \$1.00; $\frac{1}{16}$ oz., \$1.75.

YELLOW GEM: The largest flowering golden yellow of compact habit.

WHITE GEM: The finest large flowered pure white. Almost as large as Pansies.

ADMIRATION: Large dark blue.

APRICOT: Apricot yellow tinged orange. A striking color.

ARKWRIGHT RUBY: Ruby red. Unlike most violas they have a large blotch.

BLUE BEAUTY: Early bright blue of good habit.

BLUE ELF: Top deep violet shading lighter toward the bottom. Yellow eye.

BLUE PERFECTION: Very popular purple blue. A good one.

CHANTREYLAND: The finest pure apricot. Grand in mass planting.

KING HENRY: NEW! Rich violet blue with attractive small yellow eye.

LUTEA SPLENDEUSE: The standard golden yellow.

PAPILIO DEEP VIOLET: Really true violet color.

PAPILIO LIGHT BLUE: Light blue with white center. Penciled throat.

IMPROVED SCOTCH BEDDING MIXTURE: Large flowered mixed.

WHITE PERFECTION: Large flowered pure white. Profuse flowering.

VIOLA PLANTS WILL BE LISTED IN OUR FALL PERENNIAL LIST.

This Specimen was over four inches in diameter. The strain is well balanced in color, with fine form and size. Early flowering.

INTRODUCED in 1937, Harrold's Pedigreed Swiss Giants have developed a high popularity.

Outstanding Mixtures

HARROLD'S PEDIGREED GIANT ART-SHADES

We consider this to be THE FINEST EXHIBITION type of Pansy available today. With good culture the flowers are extremely large (we have had them five inches across in the seed production field). They flower very early and the coloring is very brilliant. Normally there are over 500 color combinations and markings in this mixture with many pastels as well as pure deep colors. The markings, typically Exhibition, range from self colors through the dainty penciled to the tri-color blotches having a veritable rainbow of color in a single flower. The plant habit is equally robust and this variety is hardy under reasonable treatment anywhere in the United States and most of gardening Canada. For mass bedding these are not excelled in their display because of the brightness of the color scale while selections from this mixture will give outstanding specimens for individual setting. The flower stems are long, usually being adequate for good bouquets. This variety is an improved progeny of our Harrold's Pedigreed Giant variety.

SEED PRICES: Per packet, about 500 seeds, \$2.00; $\frac{1}{16}$ oz. \$4.00; $\frac{1}{8}$ oz., \$7.50; $\frac{1}{4}$ oz., \$13.00; $\frac{1}{2}$ oz., \$25.00; 1 oz., \$45.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th. — 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$12.50; 1,000 for \$45.00 postpaid.

HARROLD'S PEDIGREED SWISS GIANTS

Our latest and finest "Fancy" type Pansy. The Fancy type has the typically large center blotch as shown in the picture at the top of this column. This variety is the ultimate in flower size and color range on compact, sturdy plants. The flowers of heavy substance and velvety texture are brilliantly colored with many red and deep shades which are individually outstanding. Under good culture it is possible to grow $4\frac{1}{2}$ inch flowers from this strain though in this respect it is not quite so large as our Harrold's Pedigreed Giant Art-Shades. For variety we suggest the use of both these varieties if you really want the maximum in display.

SEED PRICES: Per packet, About 500 seeds, \$2.00; $\frac{1}{16}$ oz., \$4.00; $\frac{1}{8}$ oz., \$7.50; $\frac{1}{4}$ oz., \$13.00; $\frac{1}{2}$ oz., \$25.00; 1 oz., \$45.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th. — 25 for \$2.50; 50 for \$4.00; 100 for \$7.00; 250 for \$12.50; 1,000 for \$45.00 postpaid.

HARROLD'S PEDIGREED GIANTS

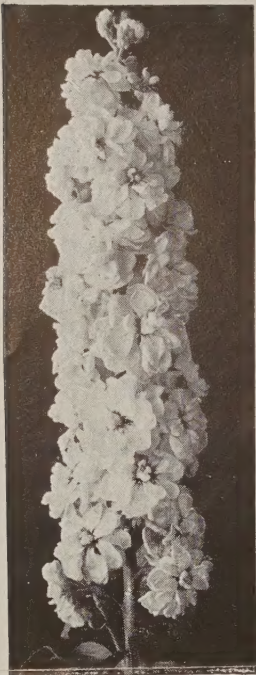

This outstanding "Exhibition" type was introduced by us in 1929 and has maintained its popularity throughout the years. Flowers are very large on compact, robust plants that produce a most varied range of bright colors. The flower markings are typical of the type with selfs, penciled and blotched centers and tri-color patterns of contrasting colors. Many flowers over 4 inches with good culture.

SEED PRICES: Per packet, about 500 seeds, \$1.50; $\frac{1}{16}$ oz., \$3.00; $\frac{1}{8}$ oz., \$5.50; $\frac{1}{4}$ oz., \$10.00; $\frac{1}{2}$ oz., \$18.00; 1 oz., \$35.00.

PLANTS FROM OPEN FIELD BEDS: Ready after Sept. 15th. — 25 for \$2.00; 50 for \$3.25; 100 for \$5.50; 250 for \$10.00; 1,000 for \$35.00 postpaid.

HARROLD'S PANSIES are noted for their ability to produce the largest flowers on desirable, compact plants. The color range has never been surpassed.

Delphinium Seeds PACIFIC GIANT HYBRIDS

This strain of hybrid Delphinium is without doubt the finest available today for the American garden and is quite hardy permitting its culture almost anywhere. They come remarkably true from seed for stock of hybrid origin and the plants are more resistant to disease than any other we know of. Not quite as tall as the English Hybrids, the flower stems are tough and willowy, withstanding the wind in exposed situations much better. The flowers are huge and the percentage of double flowers produced is very high when grown from our seeds. In fact we know of no better variety or strain.

PLANTING: Delphinium seeds germinate very erratically in warm weather and we find the best way to produce plants for spring setting is to plant about Sept. First in a cold frame and winter without transplanting. We supply culture sheet on this type of culture with each order. Plants grown this way will be nice for setting the following spring after planting and they will then bloom the first season.

SEPARATE COLORS AVAILABLE

BLACK KNIGHT: Really dark shades of velvety texture.
BLUE BIRD: A fine medium blue with white bee.
BLUE JAY: A very intense, brilliant blue with dark bee.
CAMELIARD: An exquisite pure lavender. Very striking.
GALAHAD: The best pure white ever produced. Heavy in doubles and comes highly true to color for a white.
GUINEVERE: A pinkish lavender with white bee. Very fine.
KING ARTHUR: Royal violet blue with white bee. Very large.
LANCELOT: Pure lilac with white bee.
ROUND TABLE: An exquisitely blended mixture of all these select colors.
SUMMER SKIES: Light blue with an attractive white bee.

SEEDS: Per packet about 200 seeds, \$1.00; 3 packets (150 seeds each) \$2.50; 6 packets (100 seeds each) \$3.00; 10 packets (100 seeds each) \$4.50.

Hardy Primroses HARROLD'S Pedigreed GIANTS Primula Polyanthus-Veris Hybrids

We feel sure that this is one of the finest, if not the finest strain of this plant available today. We have developed it through many years of intensive breeding and in so doing have given you a more hardy, larger flowered plant adapted to more varied cultural conditions.

The plants are compact and of robust growth with giant leaves. When grown in suitable conditions they will produce flower heads of 6 to 8 inch diameter with individual florets often over two inches across. The color range is brilliant and includes yellow, red, purple and a really giant white as well as many unusual pastel, pink, flame and bronze shades. A few blues are included in the mixture, although because these generally do not equal the quality standard set for this variety we have not been able to use many.

PLANTING: Sown in late July through September, these will give some flower the first spring from early plantings. They germinate better and grow faster after the extreme heat is past and the small plants will require some protection the first winter where the temperature is lower than 15 degrees above zero. An ideal plant for quite heavy shade and partial shade (morning sun). No garden is quite complete without a bed of these which is one of the first to make a really bright display in early spring and lasts for about six weeks.

SEED PRICES: Packet of about 100 seeds for \$1.00; 3 packets for \$2.50; 6 oz., about 1500 seeds for \$10.00.

PLANT PRICES: Yearling plants that may be set this fall for good bloom next spring. Ready after September First, 3 for \$2.00; 6 for \$3.50; 12 for \$6.00; 25 for \$12.00 50 for \$22.50; 100 for \$40.00; 250 for \$80.00. Smaller plants will be offered at lower prices later for next spring delivery. Cultural sheet will be supplied with all orders.

NOTE— These come in mixed colors only so no color selection can be given.

IT'S FUN TO FORCE YOUR OWN

Easter Lilies

Harrold's Pedigreed Strain
CROFT EASTER LILIES

Force Easily Or Grow Well In The Garden

CROFT LILIES have been the sensation of the professional trade as a Lily for Easter forcing ever since their introduction just before the war. If you have a small conservatory or flower window where it is possible to maintain temperatures of 60 to 65 degrees at night our HARROLD'S PEDIGREED STRAIN Oregon Grown CROFT LILIES can be bloomed in time for Easter easily. We supply a Culture sheet with each order and send out only the finest, professional florist forcing quality bulbs of proper size to produce 4 to 6 blooms each when properly forced. This Lily is the very finest used by the florist trade and the pot plants at Easter time bring from \$0.75 to \$1.00 per bloom or more than \$3.00 per pot. The plant growth is about 24 inches high and the flowers are huge, often 8 inches or more long and the purest white. We will ship forcing quality bulbs at the proper planting time (Oct. to Dec.) but no orders for forcing grade can be accepted after November Fifteenth.

FORCING BULB PRICES: \$1.00 each; 3 for \$2.75; 6 for \$5.00; 12 for \$9.00.

FOR GARDEN PLANTING

THIS LILY IS HARDY where temperatures do not ordinarily drop below ten degrees below zero if given light protection. They may be planted in the garden where their huge flowers on compact, heavy plants make them one of the most beautiful of garden Lilies. In the garden they bloom in June or July and we know of no other Lily that will compare with them in beauty. In severe climates they may be potted in large pots and held inside in a cold (30 to 40 degree) storage and moved outside after danger of heavy freezing is past.

PRICE OF GARDEN GRADE: These are NOT suitable for forcing but will bloom well next summer if planted before the ground freezes this fall. Ready after Oct. First at 3 for \$2.00; 6 for \$3.50; \$6.00 per dozen; per 100 \$45.00. Bulblets that bloom the second year, \$2.00 per dozen; per 100 \$12.00.

COMMERCIAL PLANTING STOCK

For those growers wishing to undertake commercial culture of these Lilies we can supply quality planting stock as follows. 5 inch yearlings, \$30.00 per 100; \$275.00 per 1,000. 4 inch yearlings \$25.00 per 100; \$235.00 per 1,000. Graded Bulblets, 2 to 4 inch \$12.00 per 100; \$100.00 per 1,000; 5,000 for \$450.00 and 10,000 for \$800.00. Booklet on commercial culture supplied free with each order or a copy supplied postpaid at \$1.00. All prices are prepaid except at the 1,000 rate. Orders should be placed before October Tenth.

Anemones - Giant Windflower

Very showy flowers in early spring or may be forced indoors in late winter. The colors are exceptionally brilliant. Culture is about the same as for Tulips except that they need a bit warmer location and a little protective mulch. We offer only TOP size bulbs, the best, for either garden planting or indoor forcing.

SINGLE FLOWERING: Colors red, blue, lavender, pink, white and a select mixture 12 for \$1.00; 25 for \$1.75; 100 for \$5.00; 250 for \$10.00.

DOUBLE FLOWERING: Don Juan, red; Lord Derby, blue; Queen of Violets, violet; Rosette, rose and white variegated; Surprise, carmine; Purity, white and St. Brigid, finest mixed. Price 12 for \$1.50; 25 for \$2.50; 100 for \$8.00; 250 for \$16.00.

Please Read Before Ordering

NO GUARANTEE — In common with general practice in the seed and nursery trade we do not in any manner guarantee the results or crop obtained from any material we send out. The wide range of conditions under which culture may be undertaken as well as the varying skill of the individual gardeners should make the reason for this obvious. We use every care in growing and handling the material offered and endeavor at all times to supply stock true to name and description that will satisfy you. In no case, however, will we assume a responsibility greater than the amount received as the original purchase price and if for any reason an adjustment is indicated we reserve the right to make such an adjustment in the form of replacement in identical kind ordered, credit memo on future purchase or cash at our option. ALL claims for bad order arrival or any other cause must be reported promptly in accord with instructions on our invoices.

PAYMENT — All mail orders MUST be accompanied by the full amount of the order in cash. This may be sent by postal money order or note, express money order, bank draft or personal check. If by personal check and your bank makes any collection charge to the payee please remit the amount of these charges as remittance is expected to be collectable at par. Remittance from foreign countries must be by postal order or New York draft collectable at par in United States funds. Currency sent by mail is at your own risk. **WE WILL NOT ACCEPT POSTAGE STAMPS FOR ANY PART OF REMITTANCE** so please don't send them. They will only be returned. Our postage is all by meter and stamps are entirely worthless to us. Prices quoted herein, except as specifically noted are prepaid inside the United States. Special handling or foreign transport will be charged for at cost.

ALL OFFERS ARE MADE SUBJECT to stock remaining available at the time an order is received. We suggest permission to make substitution be given where possible as it may on rare occasion make filling order complete possible.

MAKE REMITTANCE PAYABLE TO:— HARROLD'S,
